

Project 7

Course Code and Name: MSJ2202 Convergence Communication II

Project Name: "Echos of Mastery."

Project Type: Video Art

Project Theme: Theory of Desirable Diffculty

Semester of Submission: Spring 2024

Project Description:

This project is a Video Art titled "Echoes of Mastery." The video illustrates that true learning comes from understanding, continuous practice, and real-life experience rather than simply memorizing information. Through creative visuals and storytelling, the project highlights the importance of patience, repetition, and self-improvement in mastering any skill.

Project Justification:

Learning is a continuous process that requires practice and experience. This project was created to encourage viewers to value the journey of learning and understand that real growth comes from applying knowledge in practical situations. It also demonstrates how video art can communicate meaningful ideas creatively and engagingly

Submission date

14th March, 2024

Title: Echos of Mastery

Idea: Each job has its unique aspects. Some tasks are easy, while others are more challenging. If you simply learn something, you might not remember it properly. It's better to understand it deeply, practice it repeatedly, and experience it in real life rather than just learning by doing. That's what I want to show in my video art: tackling each task, and practicing it repeatedly, because even after learning, real-world situations can be unpredictable, and knowing how to learn can be essential.

Visualization:

Shot 1 (Titling): Close shot. Indoor

The title comes into a Rubik's Cube through matching word

- Message: Education is a straight-line solving by brainstorming.

Shot 2: Mid shot. Indoor

A subject with a white shopping bag on his head. And the subject is talking with sign language about learning.

- Message 1: The white shopping bag represents the emptiness or blankness of a human and the subject is inserting or filling it up with experience. The process of learning and gathering experience of life.
- Message 2: The bag is working like a wall that is preventing to insertion of more and more experience in the subject's mind. A barrier that is preventing humans from gathering knowledge.

Shot 3: Top shot. Indoor

There are some intellectual games in the frame. And a hand is playing them one by one.

- Message 1: The game represents different difficult possibilities of any step in the life of a human.
- Message 2: Lack of focus of humans in one direction.

Shot 4: Close shot. Indoor

A calendar turns over page by page as it indicates that time is running. Some dates are marked in symbolic forms.

- Message 1: How time passes away and humans gather new experiences.
- Message 2: The repetition of life. Giving time to improve a human self through difficult learning. That is practicing again and again.

Shot 5: Top shot. Indoor

A Broken Cycle is lying on the ground and a spotlight moving on it.

- Message 1: The real-world result of an execution can fail many times.
- Message 2: The harshness of the world that a human has to face to improve.

Special note: All these shots will be showcased as single-screen disoriented multiple frames in a frame. (optional)

Production Plan:

Cast: Moyen Udhay

Editing By: Samia Athay

Background Sound: swing machine sound, sound of a steps, broad game sound.

Location: Home (Demra)

Equipments:	Props:
1. Phone Camera (Samsung s20)	Calendar
2. Tripod	Broken Cycle
3. Torchlight	Puzzle game
4. poly paper	Coin game
5.	Chess game
6.	White shopping bag
7.	Table
8.	chair
9.	White cloth
10.	Cycle wheel
11.	Rubric cube.

Learnings and Outcomes (Self-reflection):

- Learned how to express an idea through video art and visual storytelling.
- Improved my creative thinking and video production skills.
- Understood the importance of practice, patience, and continuous learning in personal growth.
