

Project 14

Course Code and Name: MSJ 3141: Public Relations Campaign

Project Name: “গ্রামীণফোন ডিজিটাল স্কুল: ডিজিটাল ভবিষ্যতের পথে”

Project Type: Campaign Planing

Project Theme: Poverty Trap Theory

Semester of Submission: Summer 2024

Project Description:

This project was a Public Relations campaign plan titled "গ্রামীণফোন ডিজিটাল স্কুল: ডিজিটাল ভবিষ্যতের পথে." Our team developed a campaign to promote digital education for children from underprivileged communities through Grameenphone's CSR initiative. The campaign included communication strategies, content planning, and digital engagement activities. As part of the project, we also produced a promotional social media reel to raise awareness and engage the target audience

Project Justification:

Digital education can help reduce the poverty gap by creating better learning opportunities for children. This campaign aimed to encourage awareness, community participation, and corporate involvement in promoting digital literacy through an effective Public Relations campaign

1.State the Challenge/Opportunity:

Challenge: The challenge of closing Bangladesh's digital divide, particularly in underserved and rural areas, is met by Grameenphone. While digital transformation is happening quickly in urban areas, rural communities continue to be neglected and have little access to digital information, resources, and connection. Their ability to participate in the digital economy, pursue educational opportunities, and improve their life is hampered by this discrepancy.

Opportunities: Providing rural children with in-demand digital skills like content production, digital marketing, and freelancing is an unique opportunity presented by this initiative . With the help of TikTok and the National Youth Tech Center, as well as Grameenphone's resources and reputation, this project has the potential to make Kurigram a shining example of digital inclusion and poverty reduction. The initiative establishes a replicable foundation for other areas by offering free internet, training, and mentorship, therefore reinforcing Grameenphone's leadership in social advancement and Corporate Social Responsibility (CSR).

Marketing objectives:

- 1.Make rural women and youth more aware and gain knowledge of the advantages of digital literacy.
2. Grameenphone service as an essential tools for promoting digital empowerment.
- 3.Showcasing Grameenphone's dedication to societal impact will increase brand equity.
4. At least 20% more people will participate in and be engaged with digital training programs in six months.

Target Audience:

- 1.Youth from rural areas, ages 18 to 25, who are keen to use digital tools to investigate career, educational, and entrepreneurial prospects.
2. Influencers in the community who can increase the campaign's effect and reach include NGOs, educators, and local leaders.

3.people who live in underprivileged locations and have no access to traditional educational or employment possibilities.

2.Target Audience Analysis:

Market Research and Targeted Customer for Grameenphone Digital SchoolThe campaign Grameenphone Digital School works on Bangladesh's urgent demand for digital and technological education and the skills of it, therefore grameenphone has initiated this opportunity of teaching freelancing, digital marketing, content creation, graphics design hands-on to make the current youth skilled in this sector. smartphone and internet usage rate is increasing day by day in the country as affordable internet data bundles and offers are especially accessible by GP,, so it has an ideal market for digital and technological education. With the growing economy , many Bangladeshi freelancers work on platforms like Upwork, Fiverr, and Freelancer to earn a significant amount of financial stability. Nonetheless, there is still a need for formal training, especially for people in rural areas who are still trying to get out of poverty trap, in digital skills, especially in rural areas. This program can reach the urgent need to give our youth an useful skills to get rid of poverty trap, lower unemployment and promote self-employment.

Market Research:

Phase	Description
Growing Demand for Digital Skills	With Grammenphone's increasing internet penetration and smartphone usability, there's a high demand for digital skill education in Bangladesh.
Gig Economy	Upwork, Fiverr, and Freelancer are attracting Bangladeshi freelancers, but there's a huge gap in formal training, especially in the rural area
Key Market Trends	Our youth society is unemployed, there is a demand for digital skills, the government's digital transformation initiative, and the need for rural inclusion.

Targeted audience:

Phase	Description
Unemployed Youth	About the aged 18-30 people, seeking career opportunities or flexible income streams through freelancing or content creation
Aspiring Entrepreneurs	Some People want to start or grow businesses to escape the poverty trap using digital marketing strategies.
Freelancers	Freelancers/ freelance companies to collaborate with future campaigns like this.
Merchant & wellOwners	Macro and big enterprises aim to engage social media for customer engagement and sales growth.
Women and Marginalized Groups	empower these communities with self-employment opportunities in the digital economy.
Rural and Underserved Populations	People in rural areas where traditional job opportunities are scarce

Earnings in the Freelance Sector:

Phase	Description
Bangladesh Freelancers	Approximately 10 lakh freelancers, with 650,000 in the IT field, collectively earn around \$1 billion annually.
Average Earnings	Freelancers in Bangladesh earn around Tk 20-25 thousand per month on average

Average Earnings	Freelancers on these platforms can earn a satisfying amount, depending on their expertise, skills, and experience. For example, web design tasks on the platform Upwork can earn approximately \$28 per hour.
-------------------------	---

3. Campaign Strategy

The campaign follows are few strategies that would help the campaign sustain and attain its goal and objectives. Here are each strategies and explained how it worked for the campaign to succeed,

A campaign with a cause: corporate social responsibility

The campaign has a life-altering social incentive that would benefit a thousand people who are the victims of the poverty trap. An established organization like Grameenphone would earn social respect and recognition as a company that dedicates their services for general people who need it the most. This way, it achieves the campaign goal to raise awareness and show GPs commitment to the society's betterment. It also attracts potential socially aware NGOs, collaborators for brand engagement with a competitive upperhand as well being the first initiators.

Differentiation: standing out among competitors

The campaign stands out in its own services and mobility as it has never been done before, especially by a company who aim to takethis strategy emphasizes on offering new and unique services that differentiates this company from its competitors where Bangladesh has already cost sensitive market, so any campaign needs to be culturally relevant, with customer first approach to stand out.

This strategy helps attain the campaign goal of making it replicable and inspirational for other corporations so it's scalable for future initiatives too.

UGC content marketing:

The campaign will reach the maximum target audience authentically through user generated content marketing on Tiktok. Bangladesh has around 37 million tiktok users above the age 18, which is the perfect target audience to inspire (Social Media Use in Bangladesh Grows by 22.3% in 2024; Facebook Leads, 2024).

This strategy, aiming our day-to-day camping goals, encourages customers to share their experiences online with a brand, creating organic, relatable content like vlogs, following trends, reviews etc that build trust and credibility. This creates direct communication with participants daily to maintain routine interaction with students. Again, our campaign has customized hashtags, contests, and challenges to inspire users to showcase the creativity they learnt from our campaign, which speaks our brand's voice. UGC builds community and brand loyalty amongst customers. In our targeted market, personal recommendations and social connections in the media play a huge role in influencing consumer decisions, thus UGC marketing is particularly effective in influencer marketing. The cost-effectiveness of UGC, along with its ability to create real connections make this strategy establish a positive image in people.

4. Outline Of The Report

There were few changes after executing the final production. Key changes are given below:

Serial Number	Key Changes Area	Previous Plan	Updated Plan
1	Messaging Framework	Original: Helping Bangladesh to get out of the poverty trap through digital skills	Revised: Empowering families and communities through education and digital skills – with Grameenphone Digital School.
2	Storytelling Approach	Incorporate the emotional, relatable story of the Rickshaw Puller and his daughter's educational journey into the campaign narrative.	Emphasize themes of family aspirations, education as empowerment, and breaking the poverty cycle. Relatable story of a Tea Seller's struggle

3	Offline Activities	Focus community messaging on personal stories to connect emotionally with rural populations.	Revised: Share the tea seller's reel during community events or workshops to inspire attendance.
4	Campaign Objective Adjustments	Showcasing Grameen Phone's commitment to rural communities to form the digital hub for development in a positive way	Revised Objectives: Highlight the intergenerational impact of the digital school program.
5	Hashtag Changes	#SkillForTomorrow:	#ChangeALife
6	Strategic PR Activities	Influencer Collaboration	A Reel
7	Budget Adjustments for Location	First Location was in Dhanmondi Lake.	Revised location closer to 4A which added additional expenses of each member.

5 & 6. Content Creation & Channel Selection

Channel Selection:

Channels are crucial to campaigns as they determine how effectively the message reaches the target audience, ensuring maximum engagement, visibility, and impact to achieve campaign objectives. So we choose the most growing platforms and their growing segment. Now Facebook, Instagram, and TikTok are the fastest growing platforms for content. And also Their reels segment is the most reachable option to audiences. So we made a video in reel format as well.

Content Creation:

We choose video production for the campaign. Because video is the most reachable content than a poster. We also can use it on different platforms. And we made it in reel format so that we can

easily get more reach if our placement and everything will be fine. Also it will be done by a good editor.

7. User Statistics and Fit

The chosen platforms are Facebook, Youtube and TikTok are among the most efficient for reaching the target audience in Bangladesh. These platforms have experienced significant growth and are particularly popular among younger people making them ideal for this campaign.

1. Facebook reels :

- 50 million active users in Bangladesh (DataReportal, 2024).
- The majority of users are aged 18–34, aligning well with the campaign's target audience.

2. YouTube Shorts :

- 18 million active users in Bangladesh, with steady growth.
- YouTube's focus on visually engaging content, especially through Reels, makes it an excellent choice for video marketing.
- It is engaged younger, catering to audiences seeking creative, aspirational, and socially relevant content.

3. TikTok:

- 37 million active users above age 18 in Bangladesh Grows by 22.3% in 2024.
- Over 70% of users are aged 18–34, making it the perfect platform for a socially aware, youth-focused campaign

Fit of Chosen Content Format:

1. Cultural Relevance Videos Bangladeshi audiences resonate more with those who are accustomed to storytelling through visuals. Short videos align with the attention spans
2. Engagement Potential that static content, generating higher engagement rates across all platforms.
3. The reels format allows for creative expression, emotional storytelling, and impactful delivery of the campaign's message.
4. On Facebook and Youtube , reels are prioritized in algorithms, ensuring better visibility.

5. TikTok's video-centric model aligns seamlessly with the campaign, enabling user participation through trends, challenges, and hashtags.

Supporting Visuals:

1. Graphs showing platform demographics and usage statistics.
2. Screenshots of sample Reels or TikTok videos demonstrating campaign themes.
3. Infographics highlighting statistics for video content compared to static content.

8. Review of Current Channels:

Every social media channel have their own purpose and tradition and fragmented audience for contents to relevantly appear on their feed. For our campaign, three most sustainable and efficient channels, Facebook, Tiktok and Instagram to reach our target audience and conduct our message. Because Bangladesh has approximately 55 million social media users as of 2024 according to Data Reportal. Here's identified current channels that are less effective and need strategic adjustments according to our campaign's requirements.

YouTube shorts

Among the popular channel , YouTube has a fair amount of users but its specifically for its minute long videos. However, youtube has introduced its reel format named youtube shorts due to the immense popularity of short form videos but it faces competition from the already established platforms like TikTok and Instagram Reels which are also more popular among the target audience aged 18–22. The campaign's current efforts on YouTube Shorts may not attain significant engagement or virality because of its comparatively low traction for short-form content in this demographic.

What we can do for Strategic Adjustment is focus less on the YouTube Shorts for short-form content and post more long-format content that will get to the right

people, and probably vlogs, reviews or tutorials in details and campaign updates, related to its storytelling strategy and education. And shift creative efforts for TikTok and Instagram reels where the target demographic is more active.

LinkedIn

LinkedIn has a unique set of usebase for professional networking and business to business (B2B) communication, therefore campaigns target demographic of the stakeholders , business collaborators are only relevant for this platform. So the engagement metrics can only interact with a fragment of target audience, as LinkedIn focuses more on corporate and urban professionals. Even though linkedin has newly introduced a section of short videos, it has failed to grasp the mature audience in the platform.

Thus, linkedin needs strategic adjustment to cater to our campaign plan. We can limit linkedIn use to only for the communication with stakeholders , partnership or achievement announcements, and professional updates about the campaign. So that we can use LinkedIn with a more curated plan to attract collaborative deals , sponsors, NGOs, and governmental support for scaling the initiative.

9. Integration of Existing Strategies

The campaign will use a variety of methods, such as public relations, traditional advertising, internet marketing, and promotions. Brand personalities and taglines also contribute to the effective achievement of the defined objectives.

a.Traditional Advertising

To ensure broad distribution of our campaign message, the media will concentrate on traditional marketing such as TV, radio, and newspapers. Both television and radio advertising will show how rural kids are altering their lives thanks to Grameenphone's digital skills program. Newspaper advertisements will emphasize success stories and contain inspirational imagery from community meetings.

b.PR

Public relations team will spread the message even further through press releases, media tour and community events. Program milestones, student achievements and partnerships with organizations like TikTok PR will showcase this all. To see the impact events will invite journalists . Grameenphone leadership will highlight the role of digital skills in rural development.

c.Digital Marketing

Digital platforms like Facebook, Instagram and TikTok will be used to share real-time updates. TikTok campaigns, such as the "SkillUpChallenge," will target young audiences to inspire participation.

d.Promotions

Rewards will motivate participation through remunerations or gifts. Online competitions will be enabled to have participants compete using the newfound skills and the prizes that include certificates, mentorship and technology devices. The community rewards are mobile data packages that will drive the motivation of learners; branded items that will be used to drive the campaign in rural areas include notebooks and backpacks.

e.Brand Characters

The campaign will introduce a young, tech-savvy character-animated or live-who could be used as a brand ambassador to guide participants and engagingly narrate the campaign message. In this way, the program will be more relatable to the youngsters and help them build a personal connection with the audience.

f.Taglines

A strong tagline, like "Empowering Futures, One Skill at a Time" or "Connecting Rural Dreams to Digital Reality," will then be used across the campaign materials for consistency in message and strength of identity. Inspirational Videos

Videos will illustrate the impact and success of the program. The shorter reels will be shared on platforms like TikTok and Instagram to reach a broader audience. These videos will depict the

positive after-effects of digital learning and enhance Grameenphone's image as a socially responsible organization.

A strong tagline, like "Empowering Futures, One Skill at a Time" or "Connecting Rural Dreams to Digital Reality," will then be used across the campaign materials for consistency in message and strength of identity. Inspirational Videos

Videos will illustrate the impact and success of the program. The shorter reels will be shared on platforms like TikTok and Instagram to reach a broader audience. These videos will depict the positive after-effects of digital learning and enhance Grameenphone's image as a socially responsible organization.

f.Community Events

Events will be organized in rural areas to build trust and engage the communities. The events would showcase the success of the program-for instance, students' achievements, and testimonials, among others. It will showcase contributions from various partners, including TikTok and the National Youth Tech Center, in an effort to evidence collaboration and shared success.

g.Monitoring and Adjusting Activities

Measured on social media engagement and participant feedback, the progress of the campaign will be tracked; thus, based on its results, the strategies will be tuned for better reach and effectiveness. The regularity of updates and sessions for feedback also creates transparency and involves the audience.

This integrated approach will contribute to raising awareness, empowering rural communities, and positioning Grameenphone as a reliable leader in digital inclusion and socio-economic development.

Script

Ext. Roadside- Day

একটি ভার্টিফোন পড়ুয়া মেয়ে চা দোকানে ঢুকে দাড়ায়। এর মধ্যে চা ওয়ালা মামার একটি ফোন বেজে উঠবে। ফোনের ডিসপ্লে তে গ্রামীণফোন নাম্বার দেখানো হবে। চা ওয়ালা সেই নাম্বার ধরে রেগে কথা বলবে

--

চা ওয়ালা:

আমি তোমার মাইয়ারে আর পড়াইতে পারুম না। কষ্ট কইরা কলেজে একবছর পড়াইছি, পরে কল দিমু, কাম করি।

চা খেতে থাকা মেয়েটি চা ওয়ালা মামা কে নিজে থেকে প্রশ্ন

Female student:

কিসে পড়ে আপনার মেয়ে?

চা ওয়ালা কথার উত্তর দেয়---

চা ওয়ালা

কলেজে পড়ে আপনার মতো। জানেন আমার মাইয়াডা অনেক মেধাবী, তাই কষ্ট কইরা হইলেও আমি তারে কলেজে ভর্তি করসি।

কিন্তু মামা, আর মনে হয় পারুম না, বাজারের যে দাম! মাইয়ার পিছে কম কইরাও ২০ হাজার টাকা খরচা হয়! এত খরচ ক্যামনে চালামু কন মামা!

মেয়েটি কথাটি শুনে কিছুখন চুপ করে থেকে বলবে-

মেয়েটি:

এতদূর পড়াশোনা করাইছেন তাইলে বন্ধ করবেন কেনো, বরং আপনার মেয়ে এখন ঘরে বসেই আপনাকে চালাইতে পারবে সাথে সে নিজেও পড়ালেখা করবে।

চা ওয়ালা মন মড়া হয়ে কথা উত্তর দেয়:

কি কন মামা, ক্যামনে ?

মেয়েটি:

Grameenphone digital school উদ্দেশ্যে, প্রতিটা সরকারি স্কুলে থাকছে ডিজিটাল শিক্ষার সুযোগ। আরো থাকছে বিনামূল্যে ল্যাপটপ ও ইন্টারনেট ব্যবস্থা নেয়ার প্রতিশ্রুতি, এর মাধ্যমে freelancing শিখে ৩-৪ মাসের মধ্যে সে নিজে শিখে নিজের আয় নিজে করতে পারবে। আপনাকে কোনো চিন্তাই করতে হবে না।

এরপর মেয়েটি দোকান থেকে থেকে বের হয়ে যায়। কিছুক্ষন থেমে চা ওয়ালা মামা তার নিজের মেয়েকে ফোন দিয়ে কান্না করে বলে- -

চা ওয়ালা:

আম্মা ! তোর পড়াশোনা বন্ধ হইব না,

এর পর গ্রামীণফোনের একটি লোগো এবং ট্যাগ লাইন দিয়ে গল্প শেষ হবে।

শিক্ষার পথে, গ্রামীণফোনের সাথে এগিয়ে চলুন।"

"অল্প সময়ে শেখো, নিজের ভবিষ্যৎ গড়ো – গ্রামীণফোনের সাথে।

Reflection papers

Roohama An Naba (212012028)

Through this campaign production and report assignment, I got to learn how to collaborate for the best outcome and teamwork in creating campaigns that can have impact on people, as working effectively in a cooperative environment was extremely important. Specifically in the production section of the assignment, I got to experience another side of making reel or an OVC in a storytelling format which I did not explore before. Writing and visualizing the idea seemed much easier than to actually communicating it with my peers as the ideas were clashing with multiple perspectives, though it was relieving to have a diverse point of view of a single story. It also enhanced my ability to think analytically during campaign planning, when writing the campaign strategy and the review of current channels aligning those strategies with objectives. It made me understand the modern public relations, how it works in multiple social channels. Knowledge on these made me appeal to data driven strategies, anticipate challenges especially when writing SWOT and PEST, and focus on effective solutions. Overall, it improved my strategic thinking as I got to read chapters of the book 'Planning and managing public relations campaigns', and adapted it in real-world public relations scenarios.

Ammar Binta Babul Trowya (222012046)

Working on the campaign "**Grameenphone Digital School: Path to a Digital Future**" was a very rewarding experience for me. It helped me grow as a person and learn many new skills. My roles included acting in the campaign, helping as a sub-director and working on important parts of the documentation. These responsibilities taught me valuable lessons and allowed me to discover my strength.. As an assistant director, I had to help Cinematographer to guide them with the shot, communicate clearly. This role improved my leadership and organizational skills. I also became better at thinking creatively. For the **documentation**, I worked on the campaign outline, prepared the **shot list** and wrote the section on **Integration of Existing Strategies**. Through this project, I learned that I have qualities like creativity, teamwork and problem-solving skills. Balancing different responsibilities, such as sub-directing, acting and documentation, showed my ability to handle multiple tasks at the same time. I also learned how important teamwork and good communication are for success. Working under tight deadlines improved my time management and prioritization skills.

In conclusion, this campaign was a wonderful experience that helped me grow, develop new skills and contribute to something important. It taught me the value of leadership, teamwork and creativity.

Noor-E-Jahan (212012002)

This campaign production was a nice experience for me. Here I learn how to build a good campaign plan along with a team. Creative work is not that easy, and when the work is about conveying a message to mass people through a medium and at the same time it needs to be interesting and creative then a good brainstorming is needed . From this I learn how to connect a thing with a company and make it meaningful. In TV or social media we just saw a video but behind that video there is a huge amount of work needed to be done ,and when I go to do that handson i realise the actual hustle. Writing a story is easy but when it needs to be in video then it's hard to portray , for this work when the video shoot happened i realise this. Group work is not an easy task, in a group there are different types of people and they have different choices. All coming in at one point is a tusk and this time i think we achieve the tusk pretty easy. From this I think I learn to think more strategically and do a campaign plan more strategically.

Samia Hasan Athay (221012055)

In the PR Campaign course, I got to have knowladge of audience analysis, the importance of user statistics, and production planning in a campaign. I learned how tough it is to connect audience research to campaign strategies, which makes sure that the message resonates with our audience effectively. Most interesting part I learnt was handling crew and location in terms of planning and it improved my organizational skill and teamwork skill, it also taught me to coordinate with others in the most efficient way. This experience also made my creative abilities and practical understanding of campaign logistics. The course helped me to boost my strategic thinking, my communication skills , and adaptability to any situation, which brought me closer to real-world competitiveness . It was a good experience that prepared me with knowledge in public relations and face future challenges.

These specific tasks in the assignment, and overall course helped me to build my skills that are important for a career in public relations in future. It increased my ability to take on challenges.

Lastly I also gained confidence in my ability and knowledge of practical usage, which will benefit me in my future career.

Ramjan Ali Emon. 222012037

Working in a PR campaign is always a fun university stage. Because by this type of project for the first time we can think beyond our academic syllabus and show our creativity. So it's always fun to work on a project like this.

This time we run a project Named 'Grameenphone Digital School'. Since we know that, this time our CI theme was Poverty Trap. So we choose a project which can take over from this trap. And we all know that in Bangladesh people are still unemployed by graduation. So we think that since our regular education system cannot solve this problem we plan something different. We plan a PR plan where we will show a system where people learn and earn. Like we show a project where people learn practical skills and earn for their life. And also their earning play a role for our GDP. They learn Freelancing skills, they learn content creation, they learn doing business online and everything that makes them a valuable citizen of our country.

By working on this project I learn a lot of things for my profession. Firstly that idea was mine and we designed it by everyone's opinion and plan. Everyone was supportive and well connected. Sometimes I'm not active enough for my job. I learn how an idea becomes a project and everything. I design this story by editing and cinematic. Firstly I imagine it and they run it. For this project we have to go outside and deal with people. So it increases our communication skills. Lastly, I learn teamwork from here. Thank you also Mehedi sir for being flexible for our project and opinion.

Work Distribution

Team member	Production Plan	Production Role	Production Binder
Samia Hasan Athay (221012055)	2.Target Audience Analysis, 7. User Statistics and Fit	Line Producer	6.Crew list 5.Location list

Roohama An Naba (212012028)	3. Campaign Strategy and Explain the Reasons 8.Review of Current Channels	Assistant Director	8.Propsand costume list
Ramjan Ali Emon (222012037)	5.Content Creation, 6.Chanel selection	Cinematographer editor	3. schedule
Ammar Binta Babul Trowya (222012046)	4.Outline the report, 9. Integration of Existing Strategies:	Cast Director	2.Breakdown list 4..Short division
Noor-E- Jahan (212012002)	1.State the challenge Opportunities,	Production manager	1.Script writing, 7. Cast list

Learnings and Outcomes (Self-reflection):

- Learned how to plan and develop a Public Relations campaign.
- Improved my campaign planning, content creation, and teamwork skills.
- Gained practical experience in creating social media content to engage audiences.
